

## NEW HAMPSHIRE

In the first half of 2023, New Hampshire Hospital had 187 total state hospital beds for adults with severe mental illness, 154 of which were staffed and ready for patients. This puts New Hampshire at 11 staffed beds per 100,000 population.

While no beds are specifically designated for forensic patients in New Hampshire Hospital, 25 beds (16%) were occupied by patients who were being restored to competency and 5 beds (3%) were occupied by patients who were NGRI at the time of data collection.

### New Hampshire's rank among the states

**#22** in beds per 100,000 population

**#43** in percentage of beds occupied by forensic patients

### **New Hampshire's State Hospital System:**

New Hampshire Hospital (Concord, NH) is the only state psychiatric hospital for adults in New Hampshire. The facility has 187 beds when fully staffed. The length of stay for civil patients is approximately one month (26 days), while the length of stay for forensic patients is 4.2 years (1,523 days).

New Hampshire also has 55 beds for pediatric patients through Hampstead Hospital (Hampstead, NH). These beds are not included in total counts for the adult SMI population.
